

The background of the cover is a complex, abstract geometric pattern composed of black lines on a white background. The pattern consists of various overlapping shapes, including rectangles, triangles, and polygons, creating a sense of depth and perspective. The lines are thin and black, and the overall effect is that of a technical drawing or a modern architectural facade.

THE INDONESIAN ECONOMY

TRADE AND INDUSTRIAL POLICIES

Edited by

Lili Yan Ing, Gordon H. Hanson and Sri Mulyani
Indrawati

The Indonesian Economy

Against the backdrop of growing anti-globalisation sentiments and increasing fragmentation of the production process across countries, this book addresses how the Indonesian economy should respond and how Indonesia should shape its trade and industrial policies in this new world trade environment. The book introduces evaluation not on tariffs but on new trade instruments such as non-tariff measures (SPS, TBT, export measures and beyond border measures), and looks at industrial policies from a broader perspective such as investment, accessing inputs, labour, services, research and innovation policies.

Lili Yan Ing is Senior Economist at the Economic Research Institute for ASEAN and East Asia (ERIA) and leads projects on trade and investment. She is the founder of the Indonesian Economy (www.indonesianeconomy.com). She is also a Senior Lecturer at the Faculty of Economics, University of Indonesia. She served as Senior Advisor on Trade and Investment at the President's Office of the Republic of Indonesia from 2015 to 2016.

Gordon H. Hanson is Professor of Economics at the University of California, San Diego (UCSD) and holds the Pacific Economic Cooperation Chair in International Economic Relations at UCSD's School of Global Policy and Strategy.

Sri Mulyani Indrawati is Minister of Finance of Indonesia since July 2016. She previously served in the same post from 2005 to 2010. She was Managing Director of the World Bank from 2010 to 2016.
